## PRIDE PET DOOR HELPFUL HINTS

(PLEASE READ THIS BEFORE INSTALLING YOUR PET DOOR)

### MAKING SURE YOU HAVE THE RIGHT SIZE PET DOOR

The opening of your pet door should be 1/2 inch wider than the width of your pet's shoulder. If you have more than one pet, the door should be wide enough for the largest pet, but should be mounted low enough so the smallest pet can get through it easily. However, it is not a good idea to buy a pet door larger than your pet actually needs. Too large an opening leads to over zealous behavior and money spent on spare parts.

**HINT:** A quick and easy way to determine if the pet door is the correct size for your pet is to open your sliding glass or other house door so that the door opening is the same as the width of the pet door flap, then see if your pet can pass easily through the space. Don't worry about the height, since the pet door will be mounted according to the height of your pet.

You can use the list below to determine which Pride Pet Door model is best for your pet:

#### MODEL      SIZE OF PET

- Small**      For cats or toy breeds up to 4 inches across shoulders
- Medium**      For Beagles and Poodles, or pets up to 8 inches across shoulders.
- Large**      For German Shepherds and Boxers, or pets up to 11 inches across shoulders.
- Extra Large**      For Great Danes and St. Bernards, or pets up to 14 inches across shoulders.

### DETERMINING THE LOCATION OF YOUR PET DOOR

Your pet door can be mounted in any location where there is a surface large enough to place the frames. Some important considerations are the following:

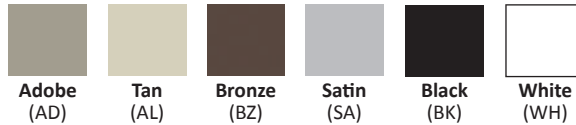

- 1. MOUNTING HEIGHT:** Bring your pet(s) to the place where you plan to install the pet door. On the surface where pet door will be mounted, make a mark to show the height of the pet's shoulders, and another mark to show the bottom of the pet's chest. Using these marks as a guide, place your pet door so that the pet does not have to stoop or jump to go through the pet door.
- 2. LOCATION ON A HOUSE DOOR:** If you are installing the pet door on a house door, it is a good idea to locate the pet door off-center, away from the house door handle or knob. This makes it more difficult for someone to unlock the house door by reaching in through the pet door. For your security, it is recommended that a deadbolt lock be added to any house door into which a pet door is installed. Also, any gates leading to an area with a pet door should be locked.

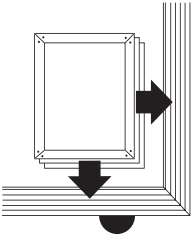

### TEACHING YOUR PET TO USE THE PRIDE PET DOOR

With just a little help from you, your pet can quickly learn to use the pet door. Lift the flap slightly and coax the pet to come through a few times. Give him lots of praise when he comes through. If the pet is resistant, a treat or his favorite food can be useful. If your pet is highly resistant, you can tie up or remove the U-frame portion of the rubber assembly until the pet feels comfortable using the pet door. Then you can put the U-frame in its original position. Never push the pet through the opening as he may become frightened and continue to resist efforts to teach him to use the door.
